-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. The examiner notes the receipt of the RCE filed June 17, 2004 with claims 7 and 10 examined below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by German Publication DE 198 14 304.4.

German Publication DE 198 14 304.4 discloses an electromagnetic valve (10 Teile) having a magnet armature, a magnet core member, a valve housing with a valve coil and accommodates a valve closure member and a valve seat, wherein the valve housing has a one-piece sleeve portion and a retaining collar, which in conjunction are seen as a preassembled module, the one-piece sleeve portion receives the valve seat and has a stepped portion that accommodates a ring filter and the retaining collar and the one-piece sleeve part are fixedly attached. The retaining collar being formed by being deepdrawn is a product by process. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product in the prior art, the claim is unpatentable even though the prior product was made by a different process (see MPEP 2113). The armature is a stepped piston and is between the valve seat and the core.

Response to Arguments

4. Applicant's arguments filed June 17, 2004 have been fully considered but they are not persuasive. Applicant's argument is that the feature of the retaining collar being formed as a separate deepdrawn part fixedly attached to the sleeve. The feature of the retaining collar being formed as a separate deepdrawn part is a product by process claim that is described above and has already been addressed in the office action of August 11, 2003. The retaining collar is fixedly attached to the one-piece sleeve part and therefore the final product is completely disclosed in German Publication DE 198 14 304.4.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Bastianelli whose telephone number is (703) 305-0058. The examiner can normally be reached on M-F (9:00-6:30).
